TERRESTRIAL MAGNETISM, VOL. 15: RESULTS OF MAGNETIC OBSERVATIONS MADE BY THE UNITED, STATES COAST AND GEODETIC SURVEY BETWEEN, JULY 1, 1911, AND DECEMBER 31, 1912 (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Terrestrial Magnetism, Vol. 15: Results of Magnetic Observations Made by the United, States Coast and Geodetic Survey Between, July 1, 1911, and December 31, 1912 In 1882 the results of magnetic observations made by this Bureau prior to 1881, together with descriptions of stations, were published as Appendix 9, Report for 1881. From that time to 1902 the results were published only in connection with a discussion of the distribution or secular change of one or more of the three magnetic elements. In Magnetic Declination Tables and Isogonic Charts for 1902, declination results were given for all stations occupied up to that time and descriptions of stations for the points occupied subsequent to 1881. From 1903 to 1911 there has been published annually an appendix to the Superintendents annual report, giving the results of magnetic observations made during the fiscal year (July to June) covered by the report. The use of the fiscal year proved somewhat inconvenient for publication purposes, as the field season of a magnetic observer almost always began before July 1 and ended after that date, so that part of a seasons work would be published in one report and the remainder in another. When in 1912 it was decided to confine the annual report of the Superintendent to administrative matters and to publish separately the scientific results which had formerly appeared as appendixes to the report, the time was deemed opportune to change from the fiscal year to the calendar year hi the publication of the results of magnetic observations. The present publication contains the results of observations made between July 1, 1911, and December 31, 1912, and therefore embraces the...
