Excerpt: . . . very good and its buildings, about 30 in number, including quarters, barracks, mess halls, galleys and hospitals, are equipped with modern heating, lighting and sanitation facilities. Climatic conditions. -- Gallups Island shared in the unusually mild winter of the Atlantic seaboard. During the time the experiments were in progress the maximum temperature was 50 F. , and the minimum 18 F. , with a mean temperature of from 38 to 43 F. As a rule the days were clear, and plenty of sunshine prevailed. There was always a brisk breeze which sometimes became accelerated to a gale of about 40 miles per hour. Occasionally it rained and less frequently snow fell. No one, at any time, experienced any inconvenience, much less hardship, from the weather during the sojourn on this station. Volunteers. --The entire contingent consisted of 49 men, 30 of whom arrived on February 4,...
